REFERENCE LETTER

Mr. Hakan Duran, born on 28.05.1998 in Niluefer, Turkey, was employed at our company, Infineon Technologies AG, in the period from 15.02.2026 to 14.03.2026.

With approximately 57.000 employees, Infineon Technologies AG ranks among the top semiconductor players worldwide. Infineon designs, develops, manufactures and markets a broad range of semiconductor and system solutions aimed at making life easier, safer and greener. The company focuses on automotive and industrial electronics, information and communication technologies, mobile devices and hardware-based security.

From 15.02.2026 until 14.03.2026, Mr. Duran was responsible for the following tasks as an Intern in the "SC Innovation" department of the "Global Supply Chain & Digital Manufacturing" division:

- Designing and implementing an agentic LLM system for executive decision support, generating weekly summaries from hierarchical KPI data through guided drill-down, story selection, and tool-based calculations
- Developing a business-language conversational assistant combining:
  - Expert-reviewed semantic context
  - Analytical tools
  - Guarded Text-to-SQL to answer questions and support follow-up analysis
- Building and executing an evaluation framework using:
  - Company data and controlled test cases
  - Assessing numerical consistency
  - Answer correctness
  - Agent behavior
  - Model efficiency against reference methods

Mr. Duran possesses good knowledge. He summed up complex states of affairs, understood what was essential, and was in a position to quickly identify solutions. Furthermore, Mr. Duran identified himself with his tasks and displayed a very high degree of commitment and personal initiative in his work. He stood up to even a heavy workload at all times. Special mention must be made of his good analytical skills. Mr. Duran worked always reliably and conscientiously. He worked independently and reliably, found good solutions, and had new ideas. His performance met with our full approval at all times.

His personal conduct was always exemplary. Mr. Duran was highly valued among managers and colleagues, and business partners.

We would like to thank Mr. Duran for the always good cooperation and wish him continued success and all the best personally for his studies and his future career and life.

Infineon Technologies AG

Neubiberg, 14.03.2026
